## Prices in British Pounds

01 January 2004

### General Notes

To simplify the explanation of prices in the variety of files available through STN, we have grouped files into three categories: text, chemical structure, and numeric property. Each section of the price list contains notes applicable to files listed in that section. In addition, the following notes apply to the price list as a whole:

The price of a custom display or print format is the price of the least expensive combination that contains all of the fields requested. HIT/KWIC display/print formats are available in many files, and the pricing is generally customized by file. Please use the online HELP COST feature or STNGUIDE for detailed pricing.

Please refer to STNGUIDE or the database summary sheets to determine the default display/print format for specific files. STNGUIDE contains the information available in the printed database summary sheets and the prices in the online HELP COST message. Database summary sheets are available in print and online at [http://www.stn-international.de/stndatabases/c\\_datab.html](http://www.stn-international.de/stndatabases/c_datab.html).

Connect hour charges are rounded to the nearest hundredth of an hour.

For databases which FIZ Karlsruhe offers through STN, the German VAT rate (currently 16%) applies (Prices are additionally given with VAT added). For all STN Columbus databases offered through STN, the VAT rate valid in the customer's country of domicile will be invoiced. For databases of the producer Thomson Derwent, London no VAT will be invoiced.

For detailed pricing information, refer to STNGUIDE or the online HELP COST messages.

With this current price list, all previous prices are no longer valid.
